VOL. XV, NO. 9

GREENVILLE, KY., THURSDAY, APRIL 10, 1913.

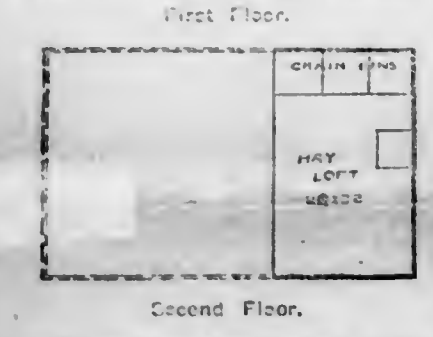

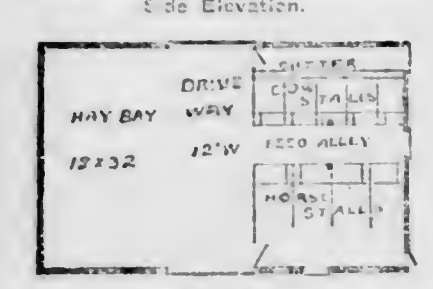

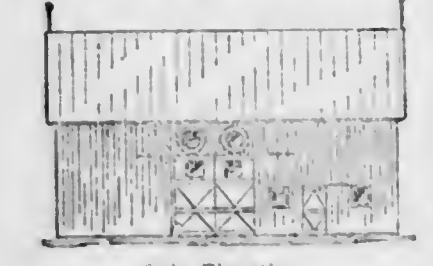

50c. PER YEAR, IN ADVANCE

HOUSES FOR PIGS AND CATTLE

FOOD BARN FOR SMALL FARM

Building Shows How Accommodations for Four Horses and Five Cows—Ample Grain Room.

The dimensions of both well adapted to a small farm are 32 by 52 feet. It contains stalls for four horses and five cows and has a "crack" way 12 feet wide. It has two hay bays, one 12 by 32 feet, and another 12 by 32 feet. Ample provision is made for the storing of the hay which may be required to meet the requirements of any farm by holding or unloading the hay-bay. This barn will take care of the stock, hay and grain, of a 10-acre farm very nicely, and costs only about \$1,600, the price varying according to the cost of material in different sections.

The barn is divided throughout with a good quality of pine, and the roof is of galvanized iron. The entire barn is painted with two coats of paint. If home help is employed in the heavy work and only a single carpenter employed, the cost of the barn may be materially reduced.

The estimate of \$1,600 is given to include the services of a carpenter and all other necessary help at day wages.

Amount of Silage for Horses.
Horses are very fond of silage, but according to Kansas Farmer there is considerable danger to their gutters too much of it. Forty pounds a day is supposed to be about the maximum amount that can be fed to cattle, but here are very few cattle that will average this much, and it should be remembered that the horse has a very much smaller stomach than the cow.

LIVE STOCK NOTES

A fattening ration will ruin a sow for a breeder.
Separate the young breeding sows from the fattening stock.
Oats and peas sown together make a great forage crop for sheep.
Over-feeding and under-exercising will ruin the best of breed sows.
Stockmasters should never sell a cull sheep, excepting to the butcher.
Better have the best and the friend ship of a good horse than that of many bad ones.
The fewer sows we keep the better are the chances of raising a large number of pigs per sow.
The winter feed of the cow should contain the essential food nutrients in their proper proportion.
If hogs are crowded in cold weather in a cold pen, they will pile up and smother the weaker ones.
Give the clients plenty of food with roots each day. They will then make a steady growth and return a profit.
It is a mistake to confine the breeding stock too closely. They should have exercise in order to develop right.
The hog that is uneasy, nervous and is constantly fighting with the others is usually an unprofitable feeder.
Never feed pigs more than they will clean up. When the feed is left in the trough or on the floor it soon becomes a loss.
Avoid crowding the lambs in the winter feeding quarters. They need a lot of room on account of their natural habit of crowding.

FARM OF FORTY ACRES

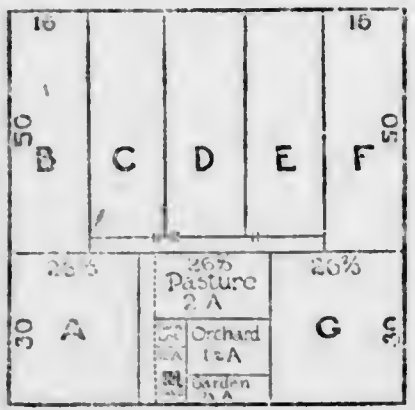

Equipment, Management and Income of Small Place.

Convenient Scheme for Dividing Land into Five-acre Tracts—One of These Utilized for Home-stand and Garden.

By W. J. B. MAN, Chief of U. S. Bureau of Plant Industry, U. S. Department of Agriculture.

Mr. J. B. Man, of the office of farm management, has been making a special study of the equipment, management and income of a large number of small farms, and has recently come from the city.

This study has given us some valuable new points of view. In general these small farms are not successful. This fact has led us to study the question more closely, and as a result, a scheme for the management of a forty-acre farm is outlined below, which seems to be practicable.

Forty-acre farm subdivided into eight 8-acre tracts. This shows a convenient method of subdivision which gives access to all the fields without crossing much land in road. Length of lines given in rods.

center on one side, and it is supposed that a public road passes this side of the tract.

Of these five acres half an acre is utilized for the house and yard and the barn and barn lot. This space is ample for what we have in view. One half acre is devoted to garden, one and one-half acres to orchard and the remaining two acres for a paddock into which to turn the stock for exercise.

By judicious management these two acres can also be made to furnish some pasture and some selling crops. The other seven five-acre tracts are to be devoted to a seven-year rotation. When this rotation is in full swing the crops on the farm for a given year will be as follows: Field A, potatoes; field B, three acres of cabbage and two acres of onions; field C, corn; field D, cowpeas; field E, corn; field F, clover; field G, clover.

The next year each of these crops would move to another field as follows: The potatoes would go to field G, which was in clover the year before. The cabbage and onions next year would go to field B. The corn on field C would go the next year to field B. Cowpeas in field D would go the next year to field C. The corn in field E would go to D, while E would be sown in clover and F remain in clover.

The next year each crop would move to another field in the same manner, so that each year potatoes, cabbage and onions are planted after potatoes, etc. The potatoes, cabbage and onions on this farm would form the market crops. The two fields of corn, the field of cowpeas and the first year's seedling of clover would furnish twenty acres of forage for the live stock, while the second year clover field would furnish pasture for the live stock during the summer.

In each of the two corn fields some winter grain, such as wheat or rye, could be sown early in August at the time when the corn is laid by that is, when cultivation of the corn ceases. This wheat would furnish fall and winter pasture for the live stock.

In the corn field which is to be followed by clover the wheat would be turned under very early in the spring in preparation for sowing the clover. In the corn field which is to be followed by cowpeas the wheat could remain until the second year clover field is ready to turn stock on, at which time it might be plowed up and sown to cowpeas. We thus have pasture during the whole year in sections where the seasons permit winter pasturing.

In states that are too far north for the economy of heavy manure may be substituted for them, and in regions too far north for soy beans, oats can be used on this field, the other crops in the rotation remaining the same. Commercial fertilizers would be required for the potatoes, cabbage and onions.

There is plenty of good literature published by the department of agriculture and by a good many of the state experiment stations relative to the cultivation and fertilization of potatoes, cabbage and onions, and the reader is referred to the literature for further information concerning the growing of these crops.

One fact to which I would call attention is that in the marketing of potatoes, cabbage and onions it is not necessary for the farmer to go to market every day for several weeks, as would be the case with such other kinds of truck crops, especially strawberries and tomatoes.

KEEPING BROOD SOW HEALTHY

Preferable to Keep Animal on Grass or Vegetable Diet as Possible—Roots Urged.

By J. C. WATKINS, STONER, Grass and Vegetable matter are the most natural food for pigs, although they will eat and can digest a great variety of things. The nearer a sow can be kept to a grass or vegetable diet the healthier she will be, and this system is preferable to dry, salted and mottled variety of grain, barley or other feeds.

Pean is most useful with grass is not available, but where it is not possible to give sows a grass run, lucerne, rape and other green forage crops can sometimes be substituted.

Roots, except that hanged must not be given at all freely as foraging sows or the pigs are almost certain to be born dead, are useful and where there is a large garden it will provide a great deal of vegetable stuff that can be advantageously employed for brood sows—stuff, too, that would be otherwise wasted. Large quantities of dry grain, and especially corn and barley, must be avoided as too heavy, and hard waste, but a few official, clover-house refuse—baked animal matter in one way or another, and may, it is said, be an exciting cause of constipation.

When at grass or getting green forage or garden stuff, a few old bones or some dry corn may be given once or twice a week.

The food for the brood sow for the last week or so of her time should be as nearly as possible that on which she will be fed for three or four weeks after she is farrowed. A well-known breeder says:

"We have ceased to give barley or other meal to our suckling sows until the pigs are at least a month old. Our brood sows are fed prepared and planted with flower and vegetable seed in preparation for his season's work. A brood sow is made by tramping down two feet of fresh manure over the area, for which a glass lid is available. Put a few inches of soil over the manure, and after the first intense heat has passed seed may be sown.

The glass should be raised to give air on all fine days when the weather is warm, and the bed must be kept moist.

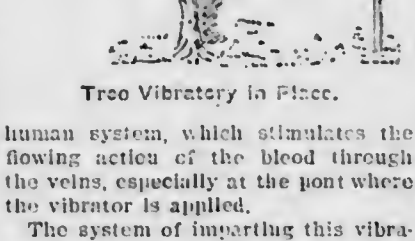

By sowing a pinch of lettuce seed every ten days a succession of salad can be produced for the table before the outdoor garden begins to bear, but the chief use of the bed is to prepare plants for setting out when danger of frost is past. Beets, all the cabbage family, cauliflower, leek, lettuce, onion, barley, squash and tomato seed may be sown in preparation for the vegetable garden.

Watch the temperature of the air within the hothed, and also the temperature of the soil. Better use two thermometers, one for the air and the other for the soil.

RABBIT TRAP IS ALWAYS SET

Apparatus Acts Automatically and Will Hold at Least Dozen Animals Before Filled.

My rabbit trap is always set, sets itself automatically and can catch from one to a dozen rabbits before they need to be taken out, writes H. L. Vinton, of Ellensburg, Wash., in the Farmer's Mail and Breeder. The trap should be 4 or 5 feet long, 4 inches wide and 6 inches high. One end is closed with woven wire. The trap

Rabbit Trap.

door is in the bottom of the trap over a pit in the ground or box. A door is put in the top over the trap door. Fasten a weight to the short end of the trap door, just heavy enough to bring the door back up level after the rabbit has fallen into the pit.

Crafted Nut Trees.
Dr. Morris has found that in his orchards near New York city, such grafted chestnut stock will begin to bear in from two to four years after the grafts are set. Southern pecan growers are securing surprising returns by grafting and top working native trees with high class stock obtained by breeding to secure the quality desired. The same is true of the walnut and hickory nut in a few instances in several eastern states, and indeed some of the kindest, far-flung nut growers are to enter upon a period of expansion in the east and north, as well as in the southwest and Pacific coast states.

Fertilizing Berry Beds.
An experienced berry grower thinks that for strawberries plenty of good stable manure, thoroughly lined and incorporated with the soil with a light application of wood ashes, will cause near meeting ordinary conditions, and will bring no disappointment in picking time, if all other requirements are met.

Creating Open Top Gradually.
By regularly cutting back the upright branches and eliminating the cross branches in the center of the apple tree an open-spread habit may be developed and maintained.

SCRAPING TRUNKS OF TREES

Loose Rough Bark is Intended for Protection Against Sun Scald and Severe Winter Storms.

Scraping off the rough bark from fruit trees, especially the apple, is of doubtful expediency, says the Fruit Grower. We see on the trunks of old trees old bark clinging there which has been present for perhaps a hundred years, during the trees in injury. Especially is this the case with the hickory tree, some kinds of which are called shag bark hickory, owing to the long strips of partly loose bark which clings to the trunk. The oak has thick and hard bark, but no one thinks of removing it. The loose rough bark of trees is intended to protect them from the scalding sun of summer, and possibly from the severe storms or frost of winter.

But when the orchardist sees loose bark accumulating on his apple, pear or cherry trees, he feels like attacking it at once with a hoe or other implement and scraping it all off. There is one advantage in having the apple and other fruit trees free of the rough loose bark, but it requires hard work for hundreds of trees. Where the bark is removed it should be carefully scraped up and the scrapings burned, for there are sure to be in this refuse some eggs or bodies of injurious insects. Should you scrape the trunks of your trees to remove the rough bark, be careful not to scrape deep enough to touch upon the inner soft whitish bark.

CHIEF PURPOSE OF HOTBED

Plants May Be Prepared for Setting Out When All Danger of Destructive Frost is Past.

March should see the amateur gardener's hotbed prepared and planted with flower and vegetable seed in preparation for his season's work.

A hotbed is made by tramping down two feet of fresh manure over the area, for which a glass lid is available. Put a few inches of soil over the manure, and after the first intense heat has passed seed may be sown.

The glass should be raised to give air on all fine days when the weather is warm, and the bed must be kept moist.

By sowing a pinch of lettuce seed every ten days a succession of salad can be produced for the table before the outdoor garden begins to bear, but the chief use of the hotbed is to prepare plants for setting out when danger of frost is past. Beets, all the cabbage family, cauliflower, leek, lettuce, onion, barley, squash and tomato seed may be sown in preparation for the vegetable garden.

Watch the temperature of the air within the hothed, and also the temperature of the soil. Better use two thermometers, one for the air and the other for the soil.

CLEANING TIME
As filth flies before the broom, so do disease germs, effete and impure matter and foul humors in the blood fly before

ELECTRIC BRAND BITTERS

They can't stand against this matchless broom of the blood. Cut they go, along with the troubles they cause, such as pimples, boils, sores, eczema, salt-rheum, malaria, rheumatism and kidney disorders. It makes a clean sweep. It cures quickly and cures to stay. It gives glorious health and vigor to the weak, sickly and run-down.

Very Serious

It is a very serious matter to ask for one medicine and have the wrong one given you. For this reason we urge you in buying to be careful to get the genuine—

THE FORD'S BLACK-DRAUGHT Liver Medicine

The reputation of this old, reliable medicine for constipation, indigestion and liver troubles is firmly established. It does not irritate other medicines. It is better than others, or it would not be the favorite liver purifier with a larger sale than all others combined.

SOLD IN POWERS

SHANNON, MERCER & CO.
DEPOY, KENTUCKY

We announce to our trade and the public that our stocks of goods in all departments are larger and better selected than ever in our history. We carry a varied line of

GENERAL MERCHANDISE

and can supply most of the wants of the people. In Dry Goods, Clothing, Shoes, Hats, Etc., we offer large selections. In Groceries, Hardware, Tinware, Farm Implements and such goods our stocks are especially strong. In all departments prices will be found the lowest, and your visits will be highly appreciated.

Undertaking Department

We have just added an Undertaking Department to our business, and will carry a comprehensive line of Coffins, Caskets, Robes, Suits, Wrappers and Dresses. Also have a Hearse in service, on call anywhere. Orders in this line given prompt and careful attention any hour day or night.

Telephones: Store, No. 1. Night, No. 17 or No. 3.

Pains All Over!

"You are welcome," says Mrs. Nora Guiley, of Broken Arrow, Okla., "to use my letter in any way you want to, if it will induce some suffering woman to try Cardui. I had pains all over, and suffered with an abscess. Three physicians failed to relieve me. Since taking Cardui, I am in better health than ever before, and that means much to me, because I suffered many years with womanly troubles, of different kinds. What other treatments I tried, helped me for a few days only."

TAKE The CARDUI Woman's Tonic

Don't wait, until you are taken down sick, before taking care of yourself. The small aches and pains, and other symptoms of womanly weakness and disease, always mean worse to follow, unless given quick treatment. You would always keep Cardui handy, if you knew what quick and permanent relief it gives, where weakness and disease of the womanly system makes life seem hard to bear. Cardui has helped over a million women. Try it.

Write to: Ladies' Medicine Dept., Chattanooga, Medicine Co., Chattanooga, Tenn., for Cardui, and for the "Woman's Tonic" and "Woman's Health" books.

June 5, 1912. W. G. CRAWFORD, Agt.	

Local Mention.

We are now enjoying the advantages of a kindergarten school.

Mr. Scott Morgan was here from Central city on business Monday.

Bring your crippled watch or clock to Mack.

Have been getting a little sunshine between showers this week.

Mr. M. Adkins, of Madisonville, was making a social and business visit here last week.

Watch, jewelry and optical repairs done quickly and properly by Mack.

Be sure to go to the opera house tomorrow night; see a good play and help a worthy cause.

Mr. and Mrs. J. A. Jonson were here from Madisonville a day or two the latter part of last week.

McCracken does watch and jewelry repairs in best manner, and guarantees his service.

If April showers bring May flowers we should have an abundance of the latter.

Mr. and Mrs. W. O. Belcher have been here from Bowling Green, on a brief visit to their old home.

See "Mrs. Briggs of the Poultry Yard," given by local talent at the opera house tomorrow night. Admission 25, 35, 50c.

Automobile drivers have learned that mud does not prevent the use of the machine, so cars are being put in service on a straight schedule.

Republicans and Progressives meet and greet and agree to disagree. This is a grand old world, even in matters political.

Trains from the South have been here a week, the waters now inter-fering with operations in that section. Railroad service from the North and East is almost normal.

Fishermen report some heavy catches during the past week, hundreds of the tiny tribe being drawn from Pond creek. Usually there is poor success, but the run has been fine recently.

Mr. and Mrs. Sherman Edwards, of Powderly, lost a month-old daughter, Violet May, who died of pneumonia Tuesday morning, after a short illness. The body was carried to Hamby for interment.

Notice to File Claims.

Persons having claims against D. H. or M. E. Martin are notified to present same, properly proven, for adjustment. Also, all persons indebted to either are notified to settle same at once.

Dr. C. E. O'BRYAN, Admr.

Terrible quarrelling is reported from the east side, where two women who had been bosom friends disputed over whether a certain flower was a gardenia or a cape jasmine. As they have quit speaking, they may never know that both were right.

Estray Notice.

Taken up as astray by Tom Fox living on what is known as "The Dutch Farm" about Dec. 1st 1912. Two red heifers about one year old and unmarked; valued at fifteen dollars each by L. Z. Kirkpatrick. Subscribed and sworn to before me by Tom Fox this the fourth day of March 1913.

J. H. LOWELL, J. P. M. C.

Mr. W. C. DeWitt arrived home from Logansport, Ind., the latter part of the week, and will remain some time. He was in the deluge, and did considerable relief work until conditions improved.

Foundation work on the new Francis building is being rushed right up, and the construction will be advanced as rapidly as possible, as there are already several applicants for the house. It will be two stories high, modern features will be incorporated, and will be one of the best stands in the city.

Mc is back.

Prof H. T. Reed Gets Promotion.

Prof H. T. Reed and wife were here a few days during the week, on a short visit to relatives and friends. They were from Burnsville, N. C., where they have had charge of the McCormick School for the past year. Tuesday they left for Frederickston, Mo., where Prof. Reed has been elected president of Marvin College, one of the leading institutions of the St. Louis Conference of the Methodist church. Prof. Reed is well qualified, both in scholarship and experience, and his many friends here are pleased highly at his deserved recognition and splendid promotion.

Mr. Robert Wickliffe Announces Candidacy for Sheriff.

In the proper column will be found in this issue the announcement of Mr. Robert Wickliffe, who seeks the nomination of his party for the office of Sheriff. Mr. Wickliffe is one of the best known and most popular men in Muhlenberg, and is well qualified for the duties of the office, as he has made a most excellent record as deputy for the past several years. He will be a strong contender for the favor of his party, and the same will carry through the general election.

A. E. McCracken, watchmaker and jeweler, is now at the bench regularly, and solicits the patronage of the public, promising quick service and guaranteed.

April 18 and 19 are clean-up days, and everyone should prepare to help.

"Mrs. Briggs of the Poultry Yard" Tomorrow Night.

The young ladies' missionary society of the Cumberland Presbyterian church will put on by local talent "Mrs. Briggs of the Poultry Yard" at the opera house tomorrow night, the proceeds to be devoted to work they have in hand. Every one is urged to attend, as the play will be enjoyable and the cause is a most worthy one. There will be special music during the intermissions of the play.

Speaking of the renewing, reviving activities of spring, there are more blooming candidates than sprigs of grass.

Miss Juliet Hancock, of Louisville, is here for the season, and will operate a dressmaking establishment at the home of Mrs. Eunice Jones. Miss Hancock has for years been with the best establishments in Louisville, and is qualified to give best service in every particular.

Mr. Ed. Taylor, of Russellville, was here shaking hands with old friends latter part of the week.

May Have Curfew Law.

The city council will consider a curfew law at its next meeting, an ordinance forbidding boys and girls under 18 years being on the streets after 7:30 p. m. being introduced at the meeting Monday night. There has been considerable complaint about the running at large of the youngsters of the city, many of whom are out until very late hours, and it has been considered by a large number of people that a curfew law is necessary for the peace and good order of the town.

Begin now to that you will not have to much work to do clean-up days.

Miss Nina Stum left yesterday morning for Atlanta, where she goes to begin a three-year course to become a trained nurse. Her many friends here have great hopes for her in the profession she has chosen.

"Pittsburgh Perfect" Fence

Put it up Right, and you'll get Double Efficiency, Long Life, Economy, Satisfaction

It's no trick at all to erect "Pittsburgh Perfect"—just follow the directions in our catalogue. "Pittsburgh Perfect" goes up without a hitch, over the most uneven ground as easily as on level land. The secret's in the Weld. It costs less to string "Pittsburgh Perfect" because it takes less time than any other fence.

Made in Different Styles for FIELD, FARM, RANCH, LAWN, CHICKEN, POULTRY and RABBIT YARD and GARDEN.

Ask your dealer for "Pittsburgh Perfect" and insist on his furnishing it. Do not allow him to persuade you that some other fence is just as good. If he doesn't sell it, write us direct.

"Pittsburgh Perfect" Brands of Barbed Wire: Bright, Annealed & Galvanized Wire Twisted Cable Wire; Hard Spring Coil Wire; Fence Staples; Poultry Netting; Staples; Razor Wire; Nails; Galvanized Wire Nails; Large Head Roofing Nails; Single Loop Rolo Nails; "Pittsburgh Perfect" Fencing. All made of Open Hearth material.

If you are interested in Wire Fencing, write for FREE copy of our ALMANAC, 1913—Pittsburgh Steel Co. Pittsburgh, Pennsylvania

Miners Bring Suit Against I. C.

Several hundred miners working in the mines from Graham to Central City recently brought suit against the Illinois Central Railroad Co. for damages on account of the failure of the company to supply cars during the last few months of 1912. On this account, they claim, the mines were not worked, and they ask reimbursement for wages lost. The case came before Judge J. J. Rice in quarterly court last Monday, and he has the case under consideration. While the individual amounts are small, the total sought to be recovered runs above \$100,000, and is the largest suit of the kind ever brought here. There is considerable interest in the matter, and much speculation as to what the outcome will be.

Uncle Jesse Pearson, 83 years old, Mr. W. H. Pearson, wife and daughter, are here on a visit to Mr. J. A. Pearson and family.

Messrs. Tate & Pearson have moved their saw mill to the Max Weir lot, near the old tobacco factory, and are again ready for business.

Mr. and Mrs. W. G. Duncan, Sr., will arrive from Bessemer, Ala., where they were called last week by the sudden illness of their daughter, Mrs. I. F. Swallow, who was seriously ill, but who is rapidly recovering.

Miss J. W. Richardson and Miss Annie Emberton left yesterday for their home in Hampton, Va., after a visit of some months here, with relatives.

Farmers are getting very much enthused over the prospect of the two agricultural experts, and these gentlemen are receiving calls from all parts of the county in general, and from many of the prominent farmers.

Mrs. D. H. Knight and child have returned from a visit to relatives in Hopkins county.

"Bob White" is without doubt the best flour on earth.

"JUST FOR THE FUN OF IT"

Try making an oak or mahogany effect on your old chairs and table.

You will be tickled beyond belief with the results.

WALLPAPER, Special Prices at Roark's

4

Undertaker's Goods: Coffins, Caskets, Robes, Wrappers, Slippers, Grave Vaults. Disinfection—ROARK

Use Warm Water, Soap and Piece of Flannel, Drying Well With Towel.

Do not burn near the door, as you may require to leave the room to get fresh water, and it is unwise to walk on the carpet when damp. Make the floor mild to do without the room being soiled by running the carpet off towards the door as possible, and work towards it. The flannel is wetted, and a portion of the carpet well rubbed. It must not be overdone, only wetted to the point of being secure a good handle by running the carpet off towards the door. Then with the clean, wet flannel remove the soap. Well rinse the flannel afterwards, so that it is quite soapless when you begin again, lest the soap should be left in the carpet when the final rubbing commences. Take a dry towel, and rub to your best. Though you cannot get rid of all the dampness, you can almost dry the carpet with a dry towel, and then rub up the nap beautifully, also the colors.

Made of Rice, Ham and Tomatoes.
With a Little of Several
Other Things.

HOW TO MAKE DUTCH CAKE

The very homeliness of Dutch cake's name is enough to give it the attraction of any "top notch" comestible. Mother always used the best recipe I have ever known. This is how she made it: At supper time she boiled three medium-sized potatoes. When done they were pressed through a sieve. The two cups of boiling water mother used for the batter. She added a yeast cake and a cup of sugar when the water was reduced to lukewarm temperature.

Red Apples in Jelly.
 Pare and cut some well-shaped apples, pippins or golden renettes if possible, but any kind will answer the purpose. As you pare them throw them into water and then in a preserving pan with just enough water to half cover them. Let them coddle, and when the lower side is done, turn them. They must not lie too closely together. When ready, put them on the dish on which they are to be served with the stalks downward.
 Make a quart of the water in which they were boiled, with sugar and the thin rind and juice of a lemon. When it is cold pour it over the apples. Decorating it with lemon peel cut in narrow strips.

Saving Scrubbing Brushes.
Scrubbing brushes after use should be put away with the bristle downward. If turned the other way the water soaks into the wood of the brush and the bristles are apt to become loose in consequence.

Apple Corn Meal Mush.
This is hasty pudding with apples in it. Pare and cut in quarters or eighths, tart apples and cook in the mushy pudding till tender. Eat the mushy pork gravy on it.

A KALEIDOSCOPIC ADMINISTRATION

By A. W. MAGY.

The ninth administration of the government of the United States had more changes of cabinet members than any other administration in the history of the country. The campaign which preceded it was known as the "Tippecanoe and Tyler too" campaign, in which General William H. Harrison and his running mate, Vice-President Tyler, defeated Andrew Jackson, Tyler vice-president, Harrison president. Tyler was inaugurated on March 4, 1841, and died just one month later. Thus the presidency devolved upon Vice-President Tyler. He retained Harrison's cabinet members in office at first, but early in his administration they all dropped out. Many of the cabinet members dropped out, for in the four years the country had five secretaries of state, four secretaries of the treasury, four secretaries of war, five secretaries of the navy, two postmasters general, and two attorney generals—twenty-two cabinet officers in all. One reason for the many changes was that Tyler completely broke with the party which elected him.

Stomach troubles is but a symptom of, and not in itself a true disease. We think of Hypacidity, Hyperacidity, indigestion as real diseases, yet they are symptoms, and only of a certain specific nerve action—nothing more.

It was this fact that first correctly led Dr. Shoop to the creation of that now very popular Stomach Restorative—Dr. Shoop's Restorative. Going directly to the stomach nerves, alone brought that successful result. It is this fact that makes Dr. Shoop's Restorative, without a single exception, the only medicine that can cure that original and biggest trouble, indigestion, and such lasting accomplishment, were not to be had elsewhere.

For stomach distress, bloating, biliousness, bad breath and sallow complexion, try Dr. Shoop's Restorative. Tablets or Liquid—and see for yourself. It will cure and will do. We sell and cheerfully recommend.

A detailed illustration of a vintage treadle sewing machine. The machine is mounted on a decorative cast-iron stand with a large flywheel on the right side. The sewing machine head is positioned on a wooden cabinet with ornate carvings. The word "WHITE" is visible on the front of the cabinet. The machine is shown in a three-quarter view, highlighting its mechanical components and the sturdy stand.

Very Serious.

It is a very serious matter to ask for one medicine and have the wrong one given you. For this reason we urge you in buying to be careful to get the genuine—

THE DRAUGHT

BLACK- DRAUGHT

Liver Medicine

The reputation of this old, reliable medicine, for constipation, indigestion and liver trouble, is firmly established. It does not irritate other organs. It is not harsher than others, or it would not be the favorite liver powder, with a larger sale than all others combined.

SOLD IN TOWN F2

Miss Lena Arnold asks the patronage of the public, and guarantees that satisfactory work will be done in her clothes cleaning, pressing and repairing shop.
